HAFENI NGHIDINWA

Application Support Specialist · Data & Business Analysis

PROFILE

Calm, patient and dependable application support specialist with nearly 3.5 years in Switzerland supporting live business applications, users, clients and developers, with SQL, APIs, Zoho, Pimcore and Doxis AI.dp. I enjoy the difficult problems: finding the real cause in the application or the data, and explaining it in plain language. I am looking for a role in application support, IT service desk or data and business analysis.

HOW I WORK

- **People first:** I explain with patience until everyone has the full picture, and I see users and colleagues as people, not tickets.
- **Calm and safe, with high standards:** I create a team where people can speak openly, and I care how colleagues are doing beyond the task.
- **Structure early:** clear requirements and planning, so there are no last-minute surprises.
- **What I value:** openness, empathy and trust. Blame, micromanagement and talking behind backs are not my style.

PROFESSIONAL EXPERIENCE

IT Project Manager

06/2023 – present

Multi-Concept Group AG — Schwyz · Builds websites, funnels, automations, internal software and AI agents for service-based businesses; part of the Liberty Vorsorge AG group since 2024

- First point of contact for client incidents and change requests; analyse issues with developers in India and Switzerland and follow them through to resolution.
- Write specifications and acceptance criteria and run user acceptance tests.

Concurrent client and group projects within this role

Client project: **Logista / Fachgemeinschaft DIE MEISTER — Invoice-processing system** (2023 – present)

- Support the live invoice platform of a B2B marketplace with over 700 suppliers and over 600 customers: AI extraction (Doxis AI.dp), rules in the Spring Boot backend, supplier and customer data in Zoho CRM, XML/SFTP export.
- Resolve processing issues (duplicates, credit-note errors, OCR outages) via the admin logs and escalate vendor defects.
- Defined and tested the seller-validation and invoicing rules, which the developers coded in the Spring Boot backend.
- Planned the cut-over to Spring Boot: capacity doubled to **1,200+ invoices per day**, error rate **under 0.5%**, no data loss.

Client project: **Swiss association management firm — Statistics platform migration** (2026 – present)

- Coordinated the analysis of an undocumented legacy database (180+ tables) and the migration of **19,000+ historical periods** with **zero differences**.
- Ensured period statuses and company mergers were migrated 1:1, so no company is counted twice.
- Reviewed import results, reported data errors to the developers and wrote test manuals and acceptance criteria.

Group project: **Prefex (Liberty Vorsorge AG) — Comparison platform for 2nd and 3rd pillar (BVG) investment products, prefex.ch** (2025)

- Coordinated releases of the Pimcore platform (development → staging → production): fund search, comparison lists, the user onboarding flow and a logged-in watchlist area with the latest fund data and currency rates.
- Led the team that set up fund providers and partners in the Pimcore backend and maintained fund documents and factsheets (e.g. Liberty BVG Fund Invest).
- Monitored daily fund-data imports via FTP and cron jobs; managed the backlog and hotfixes in weekly meetings with developers and the client.

CERTIFICATIONS

IBM IT Project Manager
CompTIA DataSys+ ce
Pimcore Consultant
Pimcore Enterprise Developer
SAP (certification during studies)

INTERESTS

Hiking: nature calms me down
Reading every day
Rock climbing · Pottery · Cooking
Tech and world news
Next goal: cycling

Group project: **Lealta / Liberty pension foundations — Forms management in Pimcore** (2026)

- Create forms in Pimcore that are generated automatically as PDFs, build objects such as partner profiles and manage content in Pimcore.
- Test and validate the multilingual forms (DE/EN/FR/IT) against the originals for content, legal text, fields and translations; trace recurring errors to shared modules.
- Train the team to create forms, guide them and provide ongoing support.

Administrative Assistant
04/2019 – 01/2022

Frampton Investments Limited — Windhoek, Namibia

- Provided first-line IT support and analysed help-desk tickets to reduce recurring issues.

IT Analyst Intern
06/2018 – 12/2018

Roads Authority of Namibia — Windhoek, Namibia

- Maintained tariff data in Microsoft Dynamics (ERP) and provided first-line ERP support.

EDUCATION

German language course, level B1
2026 – present

AVS – Die persönliche Sprachschule — Baden · A2 completed; currently attending B1

Bachelor of Informatics
2019

Namibia University of Science and Technology — Windhoek · Focus: data and business analysis
